VJ PILE FOUNDATION

ROOTS OF STRENGTH

ABOUT OUR COMPANY

Having more than 30 years of field experience in the piling industry, this company was initiated by our founder Mr. G. Jayakumar in the name of SURIYA PILE FOUNDATION. And now our firm is upgraded to the new version in the name of VJ PILE FOUNDATION by the Managing Director Mr. J. Vigneshwaran M.E., Being a doyen in the bore and pile laying field, we have handled multiple kinds of residential and commercial projects with view of client satisfaction and superior quality.

Our customer focused approach has been considerably helped us with the impeccable growth and drives us towards the well established network which makes us a pioneer in the piling industry.

SERVICES

VJ PILE FOUNDATION has expertise to check out the right kind of machinery for your requirements. The experts analyse and guide you with the process depending on the type of soil.

"30 Years of Wisdom, Delivered with Next-Gen Precision"

Auger Pile

This conventional method of piling technique exclusively practised manually and used for the purposes of construction in remote places, shallow piles and low budget projects. Having an auger size ranging from 300mm-500mm diameter can drill upto a depth of 11m, according to the recommendations of soil test report and geotechnical assistance.

Concrete Pouring

04

Tractor Mounted Hydraulic Rotary Rig Pile

Tractor Mounted Hydraulic Rotary Rig Pile is widely used for larger dia pile and larger depth. This type of piling will reduce the man handling and the time taken to complete the pile is very less. This method involves boring the pile based on the diameter and the depth of the pile, till the required depth is achieved. The bentonite water will be flushed out through a whose pipe, and once the boring is completed the fabricated steel reinforcement erected inside the hole and the concrete is poured inside the bore hole.
